LONGTAIL UNDERWRITING LTD.

Job title: Actuarial/Data Analyst

Opportunity

We are recruiting an analyst to join our Bermuda based team to work between the actuarial and data management functions. This is an exciting opportunity to sit at the interface between actuarial/underwriting analytics and tech using modern cloud technology.

Key responsibilities

- Implementation of actuarial models in Python
- Building tools to automate data processing/management involving cloud based Azure SQL server
- Assisting the wider team with ad-hoc pieces of analysis
- Enhancing our internal business intelligence tools in PowerBI
- Performs other duties as assigned, including ad hoc analysis

Qualification requirements

- A university degree in a technical subject (Actuarial Science, Mathematics, Statistics, or Economics, or in a related field)
- 0-1 years of experience in a business or technical analysis role
- Strong Excel skills (i.e. v-look ups, standard formulas, etc.)
- Familiarity with Python and SQL languages
- Ability to collaborate effectively with members of team and business partners
- Strong presentation and communication skills to share predictive modelling considerations with a non-technical audience
- Ability to work under pressure to meet deadlines, yet maintain quality work
- Excellent organization skills
- Exceptional problem-solving skills
- Strong attention to detail

Suitably qualified candidates should apply to: **belinda.wright@conyers.com** or by post to: B.Wright,
P.O. Box HM 666, Hamilton HM CX or 2 Church Street, Hamilton, no later than 2 June 2022. Tel: 298-7810.
