

### **BALANCE OF PAYMENTS**

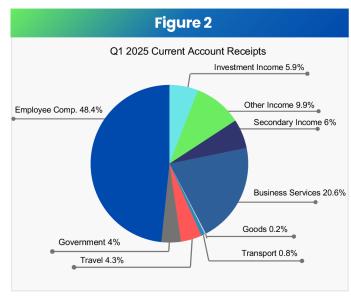

#### **Current Account Surplus = \$497 million**

The Bermuda current account recorded a surplus of \$497 million in the first quarter of 2025 (Figure 1; Table 1). This represented a \$2 million increase year-over-year. The increase in the surplus reflected an increase in receipts from non-residents along with a decrease in payments to non-residents. The rise in receipts was largely driven by employee compensation (Figure 2).

#### Contributing factors include:

- The deficit on the goods account widened by \$8 million to \$288 million.
- Service transactions realised a surplus of \$82 million, down \$17 million from a year ago.
- Bermuda's primary income account surplus expanded by \$32 million year-over-year, climbing to \$752 million in the first quarter of 2025.

#### Goods Account Deficit = \$288 million

The goods account deficit widened by \$8 million year-over-year during the first quarter of 2025 (Table 1). The value of imported goods increased to \$291 million, reflected in a rise in imported goods from the All Other Countries group and the United States, increasing by \$6 million, and \$3 million, respectively. By contrast, imports from the United Kingdom decreased by \$3 million.

Among the commodity groups, the increase in imports was reflected in the majority of the commodity groups. The increase in imports was driven primarily by fuels and machinery which increased by \$11 million, and \$6 million, respectively. Four commodity groups recorded decreases, led by finished equipment and transport equipment, decreasing by \$6 million and \$4 million, respectively.

Revenue earned from the exports of goods remained steady at \$3 million.

### **Services Account Surplus = \$82 million**

The surplus on the services account decreased by \$17 million from a year ago. The decrease in the surplus balance reflected an increase in the import of services that was much larger than the increase in exports.

The surplus balance on business services narrowed by \$5 million due primarily to the increase in receipts for other services received from non-residents.

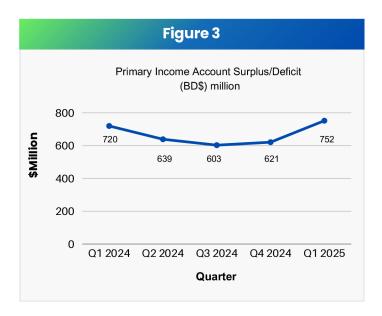

Travel services decreased by \$4 million due primarily to a decrease in receipts for business travel services, widening the deficit. The deficit for transportation services widened by \$9 million as payments for transportation services increased by \$6 million and receipts decreased by \$2 million.

# Primary Income Account Surplus = \$752 million

The primary income account reflects balances on compensation earned/paid to non-residents, and income from investments and payroll tax paid by non-resident companies to the Government.

Year-over-year, the surplus on the primary income account increased by \$32 million during the first quarter of 2025 (Figure 3; Table 1). This rise reflected

primarily an increase in employee compensation of \$32 million. Other income recorded a year-over-year increase of \$14 million, while investment income decreased by \$13 million.

# Secondary Income Account Deficit = \$49 million

The secondary income account reflects the balances on donations, insurance claims and other transfers between residents and non-residents. The deficit balance on the secondary income account widened by \$5 million from a year ago due primarily to increased nonlife insurance premiums and nonlife insurance claims paid to non-residents.

# Financial, Capital, and Reserve Assets Accounts

In the first quarter of 2025, transactions within Bermuda's assets accounts resulted in a net lending position of \$473 million (Table 1). They were influenced by:

- Bermuda's net acquisition of financial assets resulted in an increase of \$690 million compared to an increase of \$223 million in 2024.
- Bermuda increased its net incurrence of financial liabilities by \$217 million this quarter compared to a decrease of \$318 million in 2024.

## INTERNATIONAL INVESTMENT POSITION (IIP)

#### Bermuda's Net IIP Increased to \$4.9 billion

At the end of the first quarter 2025, the stock of foreign assets held by Bermuda residents registered above its stock of foreign liabilities by an estimated \$4.9 billion (Tables 2 and 3). The net IIP increased by \$514 million over the forth quarter of 2024.

#### Foreign Assets rise to \$16.5 billion

Between the fourth quarter 2024 and first quarter 2025, Bermuda residents' stock of foreign financial assets increased by \$466 million.

# Bermuda's Net Liability Position remains at \$11.6 billion

Bermuda residents' stock of foreign liabilities decreased by \$49 million from the fourth quarter of 2024.

#### **IIP by Resident Institutional Sector**

The non-financial corporations held a net liability position of \$2.0 billion with the rest of the world at the end of the first quarter 2025 (Table 2). The general government sector's external liabilities exceeded its external assets by \$532 million, largely influenced by portfolio investment decrease in Government's liability position remained unchanged from the previous quarter. Financial corporations held a net asset position of \$7.4 billion due mostly to holdings of portfolio investments in the form of debt securities. Non-profit institutions serving households also recorded a net asset position of \$95 million at the end of the first quarter.

<sup>1</sup> Data displayed represents the changes between the previous and current quarters.

<sup>2</sup> Transactions refer to any business dealings that occurred during the quarter that lead to an increase or decrease (shown as a negative) in the investment position.

Other changes include price changes, exchange rate changes, and any other adjustments to the investment position, not otherwise reflected in transactions.

#### WHAT IS THE BALANCE OF PAYMENTS?

The balance of payments (BOP) is a statistical statement that systematically summarizes, for a specific time period, the economic transactions of an economy (resident) with the rest of the world (non-resident). Quite simply, the balance of payments covers all economic transactions between Bermuda and the rest of the world. It includes the current account, the capital account and financial account.

In principle, the current account, capital account and financial account should balance each other. If Bermuda sells more goods and services than it buys (i.e., if it has a current account surplus), it has to lend money abroad to finance its exports (i.e., run a capital and financial account deficit). In theory, therefore, the balance of payments is always zero.

**Example:** Every dollar spent by a tourist in Bermuda earns the economy \$1 in foreign currency which can be used to purchase goods and services from overseas.

### **BOP DEFINITIONS AND NOTES**

#### **Balancing Item (Net Errors & Omissions)**

A current account surplus or deficit should correspond to an equivalent outflow or inflow in the capital and financial account. In other words, the two accounts should add to zero. In fact, as data are compiled from multiple sources, the two balance of payments accounts rarely equate. As a result, the balancing item is the net unobserved inflow or outflow needed to balance the accounts.

#### **Capital Account**

The capital account details transactions that involve the receipt or payment of capital transfers and acquisitions and disposal of non-produced, non-financial assets.

#### **Current Account**

Transactions on goods, services, income, and current transfers are allocated to the current account. Transactions in exports and interest income are examples of receipts, while imports and interest expenses are payments. The difference between payments and receipts determines if Bermuda's current account is in surplus or deficit.

#### **Financial Account**

All transactions associated with changes of ownership in foreign financial assets and liabilities of the economy are included in the financial account. Such changes include the creation and liquidation of claims on, or by, the rest of the world.

#### **Payments**

All monies that are paid by residents to non-residents are considered payments.

#### **Receipts**

All monies that are received by residents from nonresidents are considered receipts.

#### **Reserve Assets**

Reserve Assets are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

#### Resident

The concept of residency is very important in the BOP because the BOP is in fact a statement of transactions between residents and non-residents. A unit must have a centre of predominant economic interest within an economic territory for at least one year or more to be considered resident of that territory.

#### **Seasonal Workers**

Workers from overseas who come to Bermuda to work for a few months in the year or every year are considered seasonal workers. Their expenditure on living expenses in Bermuda is included as travel receipts. Similarly, their income received from employers in Bermuda is a BOP outflow under compensation of employees.

#### **Notes**

n.a. - Not Available

Numbers may not add due to rounding

P - Provisional

R - Revised

# WHAT IS THE INTERNATIONAL INVESTMENT POSITION?

The international investment position (IIP) is a record of Bermuda residents' investment abroad and nonresidents' investment in Bermuda. The IIP shows the balance sheet position of financial claims on nonresidents as assets and non-residents' claims on Bermuda as liabilities. The balance between these two positions represents the IIP; that is, an excess of assets over liabilities indicates a positive contribution to the nation's net wealth and the reverse signifies a negative contribution.

#### WHY IS THE IIP IMPORTANT TO MEASURE?

The composition of the IIP allows financial analysts to assess the vulnerability of the economy to changes in external market conditions. Details from the IIP can highlight mismatches in maturity of instruments and currency that can affect an economy's ability to service debt in the face of shock; financial structure problems; solvency problems and dependency problems where overreliance on another economy can present contagion concerns. Therefore, the IIP allows for a more in depth analysis behind balance sheet weaknesses that can lead to a modern-day financial crisis.

### **IIP DEFINITIONS**

### **Currency and Deposits**

Currency consists of notes and coins that are of fixed nominal values and are issued or authorized by central banks, monetary authorities such as the Bermuda Monetary Authority or governments.

Deposits include all claims that are (a) on the central bank and other deposit-taking corporations; and (b) represented by evidence of deposit.

#### **Debt Securities**

Debt securities are negotiable instruments serving as evidence of a debt.

#### **Direct Investment**

Direct investment represents the value of long-term capital owned in subsidiaries, affiliates and branches by investors in a position to exercise control or a significant degree of influence on the management of the enterprise. A measure of total investment controlled in Bermuda by foreign direct investors, or abroad by Bermudian direct investors, indicates the leverage type impact of ownership.

#### **Financial Derivatives**

A financial derivative contract is a financial instrument whose value is based on the value of an underlying security such as a stock or bond, commodity or other financial instrument.

# Insurance, Pension, Standardized Guarantee Schemes

Insurance, pension, and standardized guarantee schemes all function as a form of redistribution of income and wealth mediated by financial institutions.

#### Loans

Loans represent the extension of money from Bermuda residents to non-residents and vice versa, with an agreement that the money will be repaid.

#### Other Accounts Receivable/Payable

Other accounts receivable/payable consists of trade credit and advances between Bermuda and non-residents and, other miscellaneous receivables/payables.

#### Other Investment

Other investment is a residual category that includes positions and transactions other than those included in direct investment, portfolio investment, financial derivatives and employee stock options (ESO), and reserve assets.

#### Portfolio Investment

Portfolio investment abroad by Bermuda residents and in Bermuda by non-residents is defined as the holding of debt or equity securities other than those included in direct investment or reserve assets.
