QUANTUM™

COMMUNICATIONS

Quantum Communications provides Ethernet, Data and Voice solutions with capacities from 1 Megabit – 10 Gigabit to connect customers to their International Carriers, Data Center providers, Internet Service Providers (ISPs), Application Service Providers (ASPs), and point-to-point interoffice connections. Service excellence is reinforced through our engineering prowess and securely buried fiber infrastructure.

We invite suitably qualified technical applicants to apply for the following position within our Operations Department:

Network Engineer

We are seeking a highly motivated and technically minded individual to fill the position of Network Engineer within our Operations Team. The ideal candidate will be a team player with good logical problem-solving skills.

The successful applicant will be required to perform planning, operational and maintenance duties on both voice and data network infrastructure for all products and services in support of our highly valued clients.

Qualifications and Experience

- An associate degree in Computer Sciences or Electronics is required
- A minimum of five years hands-on work experience in an NGN Voice and/or IP/Data Networks environment
- Good knowledge of voice and data routing protocols, and router/switch hardware is required
- Good knowledge of WAN principles is required
- Expertise in voice call processing, services and routing is required
- Expertise in Sun/Intel computing platforms, including Unix, Solaris and Windows XP is required.
- Successful track record in meeting targets and objectives with proven ability to work within a team environment
- Logical problem solving abilities
- Desktop computer proficiency is essential
- Industry standard certifications (CCNA etc.) are preferred

Interested candidates should write in confidence or email, enclosing an up-to-date resume, to:
