- Detection, identification, resolution and documentation of iSeries, and DB2 incidents
- Liaise with other application and infrastructure team members and vendors to isolate and resolve incidents
- Lead or assist with deployment and configuration of new applications and interfaces as required on the iSeries
- Proactive maintenance and administration of installed applications and interfaces to optimize and ensure performance and stability
- Management, identification, maintenance and new development in support of business information reporting, investigations and implementation of file manager mappings, and CL programming
- Establishing, specifying and optioning existing and future process related to iSeries/ application management including change, configuration, deployment, release, patch development
- Monitor and review iSeries / DB2 system operation and be able to provide troubleshooting, issues resolution optimization and associated communication
- Responsible for ensuring iSeries software/ system architectures are documented and changes maintained in the appropriate tools and libraries
- Liaise with infrastructure/application teams and direct business contacts on business issue identification and problem resolution to ensure applications are leverage to the maximum degree appropriate
- Lead or assist with development of and delivery to defined and measured SLA's/SLO's

- Successfully engage in multiple initiatives simultaneously
- Assessment and estimate of future iSeries needs and the creation of IT capital and operational costs for department and project level budgets and business cases
- Other task as directed from time to time by management, including but not limited to DR and technical Projects

Experience Required:

- Detailed technical support knowledge of the iSeries hardware and software, methodologies and CL programs
- 7+ years technical support experience
- 7+ years iSeries (AS/400) administration
- Working knowledge of DB2 databases
- Knowledge of Signature Core Banking system and associated tools such as communicator preferred (preferably international version)
- Working knowledge of iSeries commands, queries and administration
- Demonstrable experience of 5+ years technical application support in a Retail banking environment in progressively senior roles preferred
- Proven judgement and decision making under pressure
- Excellent verbal and written communication skills and the ability to interact professionally with a diverse group, executives, managers, and subject matter experts
- Good phone and email skills, positive customer-centric attitude
- Good problem determination technique
- Well-organized, and will follow through on commitments to customers
- Skilled technical writer able to document problems and solutions (posting FAQs) and other technical support personnel
- Candidate must be flexible to shift/overtime when needed to ensure adequate coverage

Capital G is an equal opportunity employer and offers a competitive compensation package commensurate with qualifications and experience.
