

Fill the world with Lovemarks!

Web Designer/Developer

As web designer/developer, you will be responsible for the design, layout and coding of a complex array of web sites. You will be involved with the technical and graphical aspects of the web sites - how the site looks and how it works. You will also be involved with the maintenance and updating of a considerable number of existing sites.

Your responsibilities will include:

- Establishing the target audience for a website and identifying the type of content it will host.
- The design of the site, often working with other graphic designers within the company.
- Writing the front end code (HTML/CSS/Javascript/JQuery/etc), either from scratch or by adapting existing web site software and graphics packages to meet business requirements.
- Testing the website and identifying any technical problems, with final upload of the site onto a server and registering it with different search engines.

As web designer/developer you should have/be:

- A Bachelors degree in computer science, graphic design or a related discipline.
- At least five years experience in a similar position.
- Demonstrated skills in software programming and graphics.
- Familiarity with backend programming languages and databases (PHP/ASP/etc).
- Creativity and imagination.
- Adaptable and able to pick up new techniques.
- Good interpersonal and communication skills.
- Able to keep up to date with advances in computer technology and how this affects the business environment.
- The ability to work outside regular office hours.

Please apply in writing to the General Manager on or before **January 13th, 2012**. Enclose a resumé with a detailed breakdown of your skills, two references and recent samples of your work, including links to web sites you have built.
