Senior Communications Engineer

Reporting to the General Manager the successful candidate will support the Company's extensive infrastructure and customer owned systems including two-way radio, paging, carrier grade wireless data and AVL systems. The applicant must be a self-motivated and energetic team player with good communication skills and prepared work on-call, on a rotational basis.

Experience must include:

Electronics Diploma

- or an undergraduate degree from an accredited university.
- Minimum 5 years practical electronics experience.

Trunked Radio Systems

- Minimum 5 years trunked & conventional radio systems experience with Motorola SmartZone, SmartNET preferred.
- Minimum 5 years experience with advanced microwave and/or wireless Ethernet technologies is required.
- Excellent computer literacy, with a strong emphasis on network/communications system integration. CCNA/CCNP preferred.
- Extensive radio electronics knowledge including installation, use and repair.

Operations

- Organize tower crews for necessary upgrades or repairs to existing equipment as well as in certain circumstances climb to heights of up to 275 feet.
- Extensive experience with AVL/GPS tracking systems
- Schedule regular preventive maintenance procedures on applicable infrastructure.
- Assist and oversee necessary repairs to infrastructure.
- Keep sites and grounds clean and tidy and observe any potential or existing issues. Take appropriate steps to rectify problem or have it rectified.
- Assist in monitoring radio systems, microwave links, generators, Telco lines and other ancillary equipment to ensure they are in proper working order.

Knowledge of relevant technologies

- GPS/AVL (TrakManager), Widanet, SCADA and Paging systems.
- Thorough knowledge of Motorola R56 grounding procedures and practices.

Account Management

- development and maintenance of customer relationships.
- Project Management
- Minimum of 1 year Project management experience including development and maintenance of project plans and delivering projects on-time and within budget.

Sales & Marketing

- identifying new business and technology opportunities that have broad market acceptance and translate into sustainable revenues.
- supporting and guiding sales efforts by preparing technical proposals and in maintaining strong customer relationships pre and post sale.

Applicants should forward a detailed resume and references for the attention of East End Group HR Manager P.O. Box CR29 CRAWL, CR BX, Bermuda. Or email to hr@eegroup.bm. The closing date is January 30th, 2012.
