

Our people are our competitive advantage.

At Butterfield, we pride ourselves on being approachable, disciplined and proactive. If you embody these qualities and have the necessary experience, you may be the one we're looking for.

Risk Management Business Analyst

Enterprise Risk Management Division

This position reports to the Group Asset and Liability Management ("ALM") Technology Manager and is responsible for implementing the Bank's ALM financial model and IT infrastructure, managing market risk technology projects and data quality, as well as providing subject matter expertise for the division.

Your responsibilities will include:

- analysing data, systems and situations to produce recommendations for the design and implementation of the Bank's ALM technology reporting platform
- interpreting, analysing and coordinating data feeds from numerous and disparate systems and jurisdictions to continuously improve and support daily operations of the ALM platform
- responsibility for ALM model data quality, analysis and reconciliation; includes ability to develop, maintain and distribute financial models and reports to the Group Assets & Liabilities Committee ("ALCO") and other committees
- developing, defining, documenting and delivering business case presentations and a variety of comprehensive risk reports
- preparing financial and scenario analysis on interest rate risk, liquidity risk and foreign exchange risk
- acting as secretary for Group or Bermuda ALCO and other committees as required
- assisting with automation of liquidity, interest rate risk, foreign exchange risk and investment oversight reporting

Your experience may include:

- university degree in IT, Finance or Accounting with five years experience, in banking (Treasury, Capital Markets, Finance, IT or Risk Management)
- proven expertise in managing multiple projects with a demonstrable record of delivering on-budget, on-time quality solutions in a fast-paced environment
- superior mathematical skills and competent with complex data and pricing models
- excellent knowledge of financial markets and instruments
- attention to detail, and strong analytical, interpersonal and communication (both verbal and written) skills are required
- must be results and risk-management oriented and customer-service focused
- strong IT related technical skills and expert level skills in Microsoft Excel
