

BUILDING AUTOMATION CONTROLS SYSTEM TECHNICIAN

BESCO is seeking applications for Building Automation Controls Technician to manage both new construction and servicing of a variety of commercial and industrial control systems. BESCO is the Bermuda distributor for Johnson Control Systems and provides service to a number of high profile sites.

The successful candidate must have a minimum of five years experience in the design, programming, and commissioning of Johnson Controls building automation systems. Strong leadership skills with the ability to manage medium to large scale contracts is essential. The position requires excellent written and verbal communication skills along with the ability to provide training to customers and fellow employees.

The successful candidate must have a solid background with Johnson Controls with current experience on Johnson Metasys systems and be factory certified on the following products: NAE/NIE controllers, DX9100, VAV, VMA and LON controllers. Experience with integrations into Trane, Tridium, ABB and other third party automation systems are preferable.

Strong computer skills are necessary with specific experience on XML and HTML programming languages and the ability to generate drawings with AutoCAD and Visio. Due to the nature of the systems installed, the successful candidate will be required, from time to time, to work extended hours, weekends and holidays or as required dependant on particular job sites.

Remuneration will be competitive with industry standards an commensurate with qualifications and experience. An attractive health and benefits plan will be provided.

Persons should apply in writing enclosing full details of qualifications and experience to:
