ORBIS INVESTMENT MANAGEMENT LIMITED

ORBIS — SENIOR SYSTEMS ENGINEER

COMPANY DETAILS:

Orbis is a Bermuda-based investment company managing long-only equity and absolute return funds. Orbis strives to attract talented individuals who have demonstrated an ability to excel.

ROLE & RESPONSIBILITIES:

As a Senior Systems Engineer, you will implement, develop and maintain computing, storage and virtualization solutions. You will provide storage architecture considerations, backup and recovery techniques, replication, performance monitoring and troubleshooting and will implement, optimize, and support VMware, VDI, back office operating systems and applications.

This is a progressive role with expectations and opportunity to work with emerging Systems and Data Center technologies.

Main Responsibilities include to; install, configure and maintain Data Center Computing, Storage, and Virtualization solutions; install, configure and maintain Windows 2008 R2 servers, Exchange 2010, AD and related Windows networks; provide hands-on technical assistance to other support personnel; document IT infrastructure topology and technology for future reference. Stay current on emerging IT technologies, advise and assist on those that will increase cost effectiveness and infrastructure support flexibility; review systems and network implementations to ensure compliance with established policies, standards, licensing agreements and configuration guidelines; and participate in the design and review of new network, systems and application deployments.

KEY STRENGTHS:

Accurate with a keen attention to detail. Able to quickly investigate, abstract and understand complex systems. Positive attitude, combined with an honest and trustworthy manner. Extremely self-motivated with demonstrated good judgment and a methodical approach to problem solving. Excellent communication skills and organizational skills.

TECHNICAL QUALIFICATIONS:

The successful candidate will possess an outstanding academic record and have completed post-graduate (eg bachelors) from a top tier university in a numerate discipline or equivalent work experience, VMware VCP, VCAP, Data Center Specialization (CCENT, DCSNS) or equivalent experience. Solid understanding of storage networking fundamentals, concepts, and components, including storage subsystems, SCSI, Fibre Channel, switches, iSCSI, HBAs, virtualization, zoning, LUN masking, LVM , etc.

Blade Server and Storage Hardware: assembly, configuration and maintenance. Storage Area Network design and administration. Enterprise Backup Solutions. VMware design, implementation and administration. Windows Server technologies. Hands on experience planning, designing, and implementing Data Center server and storage solutions. Must be comfortable in the data center with multiple technologies and other industry certifications (MSCE, CCNA, RHCE, CCA, etc.

SUBMISSION DETAILS:

Applications will be dealt with in strict confidence and interested candidates should apply in writing or via email with a detailed résumé to:
