

Bermuda Commercial Bank Limited

SENIOR NETWORK ADMINISTRATOR

Bermuda Commercial Bank is seeking a suitably qualified individual for the position of Senior Network Administrator. The Senior Network Administrator will be responsible for the maintenance and administration of the BCB Group IT systems, as well as the design, sourcing and implementation of future enhancements and upgrades to the Group's IT environment.

DUTIES & RESPONSIBILITIES:

- Design, implement and maintain all the banking systems security policies and procedures
- Design, implement and maintain the Group's network architecture maximizing application and systems performance
- Define and monitor network and application performance measurement criteria
- Define and monitor network error detection and prevention procedures
- Design and maintain the telecommunications environment
- Develop and maintain efficient system backup and restore process
- Develop and maintain the systems component of the business continuity process
- Provide assistance to helpdesk personnel when required
- Maintain system patch and security levels
- Weekend and after hours will be required from time to time

THE SUCCESSFUL APPLICANT SHOULD POSSESS:

- At least 7-10 years' experience in a mixed Windows-based network environment
- A university degree in an information technology discipline or equivalent work experience
- Relevant MCSE, MCTS 2008, VCP 4/5 qualifications
- Windows 2003/2008 Active Directory and Exchange 2007/2010 experience
- Familiarity with a range of database platforms including SQL Server, Microsoft Access and Btrieve/Pervasive
- Extensive VMware and VMware View (VDI) experience
- At least 2-5 years' experience in configuration and maintenance of HP Storage Area Networks EVA 4400, c-class storage, and HP Blades

STUDYING TOWARDS OR HAVE:

- CISSP – Certified Information Systems Security Professional Certification
- Microsoft SharePoint Server 2007, IIS6/7 Apache tomcat, IBM http server experience
- S.W.I.F.T. Alliance financial messaging system
- Experience in configuration of CISCO Switches and Routers
- On and off site disaster planning, testing and recovery experience

Reporting to the Chief Information Officer, the successful applicant will work with both business and technical staff, applying their technical knowledge and networking experience to ensure delivery of a reliable, efficient, high-performance technical environment. Building on the existing architecture, the successful candidate will maintain high systems availability, implement and maintain a comprehensive network security policy and maintain the Group's DR site, communications, systems software, applications software and all hardware.

Compensation will be commensurate with the successful candidate's experiences and will include a base salary and a discretionary performance related profit share. References will be requested and verified.

Interested persons should apply by forwarding an application letter and resume no later than:

March 23rd, 2012.
