

# **TRIDENT REBAR INSTALLERS**

Requires

## **STEEL FIXERS**

We are pleased to invite applications for experienced Steel Fixers for short-term contract work. Applicants should be able to demonstrate a wide range of skills required to place rebar on a major reinforced concrete framed structure. Skills should include rebar placing and fixing, including the prefabrication of rebar mats and cages, based on detailed rebar shop drawings. The ability to read architectural, structural and rebar shop drawings is essential.

The successful applicants should be self-motivated individuals, will be good timekeepers and will have a flexible approach to work. We require individuals with a professional attitude towards health and safety and site tidiness, with a willingness to work additional hours as the project demands. They will have a proven track record, working to demanding time schedules and will have at least five years experience.

Applicants should apply in writing by Wednesday 30th May 2012, providing details of qualifications and relevant experience, together with at least two references to:
