

## **BCM McALPINE LTD**

Requires a

### **DRYWALL COORDINATOR**

We are pleased to invite applications for an experienced Drywall Coordinator, with a minimum of 10 years' experience in the management and supervision of complex drywall works and, in particular, experience in a hospital environment.

The successful applicant will be able to demonstrate the following:-

- Ability to read and understand architectural, structural and specialist service drawings and specifications.
- Detailed measurement skills for take-off of material quantities for timely procurement.
- Experience in managing the procurement of all materials required for drywall works.
- Ability to manage up to forty operatives on site and to produce high levels of finish, commensurate with high level hospital requirements.
- Expertise in the installation of lead lined partitions to Diagnostic Imaging areas and RF Shielding to MRI Rooms.
- Comprehensive knowledge of standard details for all types of partitions, including fire rating and acoustic requirements.
- Awareness of infection control requirements within a hospital environment.
- Provision of advice and input into the installation of applied finishes to finished partitions, including sheet protection, handrails, bumper rails and corner guards.

The successful applicant will be a self-motivated individual, with a flexible approach to work and a proven track record in working to demanding time schedules.

Applicants should apply in writing by June 1, 2012, providing details of qualifications and relevant experience, together with at least two references to:
