

Bermuda Monetary Authority is committed to attracting and developing the very best people who are dedicated to providing exceptional service.

Senior Analyst – Information Risk Management

Management Services Department

The Authority is seeking the services of a highly skilled professional to work as a member of the Information Risk Management team in the capacity of a Senior Analyst. Working under the direction of the Assistant Director - Information Technology, the successful applicant will be responsible for reviewing key issues and contributing significantly to the provision of information security measures and activities across the technology infrastructure from desktop to server. Emphasis is on working closely with the end user community and senior management in Information Risk Management practices that balance controls with availability and operational needs.

In this key role, you will be responsible for but not limited to:

- Developing security policies and procedures to support the corporate information risk management needs in place at any given time. Designing, implementing and maintaining an overall information risk management process for the Authority and ensuring the alignment of risk policies/procedures with the organisation's strategy and best practices;
- Identifying key risk areas within the organization, creating and monitoring key risk parameters, identifying capabilities, gaps and needs and providing guidance in managing risks. Recommending and developing control measures to improve information security including evaluating and selecting products and services; and evaluating the effectiveness, efficiency, and compliance with existing Information Security control measures;
- Performing System and Security Administration duties across all of business applications, databases, operating systems, firewalls and infrastructure;
- Oversight and management of all Business Continuity and corporate Disaster Recovery requirements;
- Developing and implementing risk event data collection and analysis (e.g. vulnerability data, root cause analyses, key risk indicators);
- Performing problem resolution and providing on-call support to ensure the ongoing availability of the Authority's Computing Solutions.

This position requires a proven technical and business background and therefore requires:

- A Bachelor's Degree in computer science or a related equivalent together with two or more related certifications i.e. CISA, MCSE+ Security, SCNP, CISSP, CISM;
- A minimum of five (5) years post qualification experience which includes a sound and practical knowledge of the full range of information risk management domains;
- The ability to work independently on routine and complex tasks;
- Proven stakeholder management skills and excellent written and oral communications skills;
- Cisco firewall and VMware administration experience is desirable
