

For over 20 years, Applied Computer Technologies has offered professional managed and maintenance services as well as product fulfillment. We believe in building strong relationships with our clients and suppliers to take advantage of and strategically use today's and tomorrow's technologies.

senior systems engineer

Applied Computer Technologies is currently seeking a highly qualified and experienced professional capable of identifying and delivering various technology solutions that meet the strategic business needs of our clients.

The successful candidate will be involved in all aspects of projects, including pre-sales needs analysis, systems design, proposal preparation and presentation, project scheduling, and systems implementation.

Minimum Requirements:

- Minimum of 8 years experience in a 'hands-on', senior consulting position
- Extensive knowledge and experience in the architecture design, implementation and support of Microsoft Exchange
- In-depth understanding and proven experience in the design and support of Active Directory including multi-forest integration and migration
- Proven experience in the architectural design, implementation, troubleshooting and support of Citrix technologies.
- Excellent understanding of other technologies including but not limited to storage and server architecture, virtualization and security principles.
- Proven ability to design and implement complex, enterprise-class IT solutions
- Demonstrable consulting experience with the ability to effectively communicate technical concepts to non-technical individuals at the C-level
- Exceptional customer service, relationship building and presentation skills
- Excellent written and verbal communication skills, to effectively communicate with clients and team members as well as produce required reports and documentation
- Appropriate certifications in your field of expertise

Interested candidates should apply in writing, with a resume, no later than August 22, 2012 to:
