

Beta Technologies Ltd.

Senior Systems Engineer

About the Job:

Our clients expect the best and that is what we are looking for, so if you are that high quality individual who is professional in all aspects of your work, then Beta Tech is interested in talking to you about joining our team. You will be supported by an outstanding group of like-minded technology and business professionals who are known for their reputation, commitment to quality, delivery and uncompromised customer service. This is the reason why our clients rely on us as trusted advisors and it is through our client's recommendations that new business opportunities arise.

Task Descriptions:

- Work with CTO to ensure business needs are identified, prioritized and accomplished flawlessly in a timely fashion.
- Function as a Technical Architect and Project Contributor for all company clients.
- Work on continuous improvement, refinement, automation and upkeep of the **end-to-end** network infrastructure.
- Resolve day to day help desk related issues.

Technical Requirements:

- Strong technical knowledge of network architecture & configuration including CISCO switches/routers, CISCO wireless solutions and VLANs.
- Strong knowledge of technical infrastructure for 2003 and 2008 Windows server environments.
- Strong Knowledge of Windows 7 & Office 2010.
- Strong knowledge of VMware vSphere 4 & 5.
- Strong knowledge of MS Exchange 2003 / 2010.
- Strong knowledge of Citrix XenApp & RDS.
- Strong knowledge of SAN & Disaster Recovery Technologies.
- Must possess CISCO CCNA certification at minimum.
- Candidate must have minimum 5 Years of "hands on" experience.

Due to the nature of the company business, the working of overtime, including weekends and some public holidays is required.

Applications in writing to include CV, covering letter and two business references.

Please send applications to: 48 Par-la-Ville Road, Suite 457, Hamilton, HM11

All enquiries will be dealt with in strict confidence.

Closing date: August 23, 2012
