

OPTIONS ELECTRICAL LIMITED

Requires a well rounded technically competent **Electrical Foreperson** to coordinate, supervise and execute a variety of projects.

The successful candidate will have a minimum of 10 years experience in the supervision of electrical systems, including staff supervision and he or she will be required to coordinate all aspects of successful project execution in the field.

Work scope will include the installation of:

- HVAC Control Systems
- Fire Alarm Systems
- Standby Diesel Generator Systems
- UPS Systems
- Renewable Energy Systems

The successful candidate must be:

- A Bermuda qualified electrician/technician and have previous installation and commissioning experience in all of the above systems.
- A complete and thorough understanding of National Electrical Code is required.
- Strong computer skills in word, excel, power point and AutoCAD would be a distinct advantage.
- The successful candidate must be willing to work extended hours, nights, weekends and public holidays as required on a project basis.
- Remuneration will be competitive with industry standards and commensurate with qualifications and experience. An attractive health and benefits plan will be provided.

Persons should apply by email to:

info@optionselectrical.com and attach full details of qualifications and experience by September 24, 2012
