

The Igility Group provides a wide range of I.T. and communications solutions to the enterprise market. We are looking for special individuals to fill the following positions:-

Senior Network Engineer

The Senior Network Solutions Engineer will be a network engineer with a strong background in Layer 2 and Layer 3 technologies, who works well and communicates effectively with others, is self-starting, creative and able to think through a project from start to finish. The successful candidate is expected to take total ownership of client's networks; from architecture, design, and documentation through deployment and maintenance.

Responsibilities:-

- Serves as senior network planning engineer to our clients' IT infrastructure teams
- Provides direct, high level network planning, architecture and engineering to our clients
- Must be strong in Multi-Layer routing and switching with various platform exposure, Load Balancing methodology, Firewall, VoIP, Unified Messaging and Wireless
- Support daily administration of various Firewall and Intrusion Detection systems
- Gather requirements and design solutions to meet client's network infrastructure needs
- Manage network projects from initiation to completion

Knowledge and Experience Required:-

- B.Sc. degree or equivalent
- Preferred candidates must have at a minimum the following certifications: Cisco Certified Internetworking expert – CCIE
- Minimum 7 years' experience as a network engineer
- Strong skill level with Cisco router and switch configuration
- Strong skill level with Firewall design, implementation and rule sets
- Strong skill level with VoIP configuration/support and Unified messaging
- Experience with common routing protocols including BGP and OSPF
- Exceptional interpersonal and customer service skills
- High technical knowledge of Cisco, Checkpoint and other networking technologies and internetworking concepts, VoIP, Unified messaging, protocols and methods are required
- Proficiency with LAN/WAN/WLAN (802.11) networking design, connectivity, routing and switching protocols
- Very strong Layer 2 and 3 networking skills

AS/400 Programmer/Analyst

The AS/400 Programmer/Analyst will be responsible to design, programme, test, implement and maintain queries and reports using iSeries (AS/400) Query and Showcase. Will be responsible for system documentation, including file layouts and descriptions; flowcharts; user manual, programme related changes/procedures and training manuals. Assist with daily/monthly AS/400 operational tasks. Must be a self-starter and motivated with the ability to work in a team environment.

Responsibilities:-

- Understand/utilize RPG IV Programming language to assist in the maintenance of business and system solutions
- Work with teams to identify and define required system modifications and/or enhancements to existing systems including changes to profiles, master files, reports, screens, system design and documentation requirements
- Support will include assisting with hardware and software upgrades, operating system PTF maintenance and security
- Assisting in technical troubleshooting and technical analysis
Provides clearly written, concise easy to understand documentation which thoroughly explains complex issues, processes, procedures, changes and proposed solutions

Knowledge and Experience Required:-

- The successful candidate will have 3-5 years iSeries (AS/400) RPG programming experience and possess comprehensive knowledge of iSeries AS/400 operations
- Knowledge of Database design and SQL, as well as Client Access and PC database formats
- Knowledge of AS/400 commands/tools, IQ Query and AS/400 Query
- Experience with Web Sphere, Siemens MedSeries preferred but not required
- Bachelor's Degree in Computer Science or equivalent experience/technical training

The successful applicants will be expected to follow the directions of their manager to fulfill commitments to our customers. You may be expected to work the flexible hours necessary to meet the needs of your clients. On-call coverage will require some evening and weekend commitment. While the role is challenging, the opportunities and rewards are directly proportional to service provided to our customers.

Interested applicants are requested to apply by sending their résumé in confidence to:-

Human Resources Manager, Igility Group of Companies
20 Dundonald Street, Hamilton HM 12, Bermuda

Or send an email with a **résumé** to: careers@igility.bm

Preference will be given to Bermudians or Spouses of Bermudians.

The closing date for this position is the 29th October, 2012
