- Develop pricing for new classes of business and/or specialized covers
- Design and develop actuarial spreadsheets and databases
- Identify and recommend potential research and development initiatives
- Monitor all Group exposures for all perils, scenarios and classes of business including but not limited to:
 - US Wind
 - US Quake
 - International Wind
 - International Quake
 - US Terrorism
 - Political Risk
 - Structured Risk
- Work closely with London based personnel in developing group capital and catastrophe management systems and processes
- Participate in Group-wide task force on catastrophe pricing and accumulations
- Compile and analyze data using commercial property catastrophe models for use in the pricing of outward reinsurance purchases

Applicants must possess the following qualifications and experience:

- Bachelor's degree in mathematics or science discipline
- Substantial progress toward a professional actuarial designation
- A minimum of 10 years database programming experience which must include Visual Basic and SQL database programming
- A minimum of 10 years Cat modeling experience
- Extensive experience in the US Cat reinsurance marketplace
- Proven ability to lead in a team environment
