Maintenance Engineer

Bermuda Electric Light Company Limited (BELCO) is pleased to invite applications for the position, Maintenance Engineer in Operations Energy Supply.

Job description: The Maintenance Engineer is responsible for all planned, preventative and unscheduled electrical and mechanical maintenance in our Diesel and Gas Turbine stations which have an installed capacity of approximately 175 MW. This includes overall management of maintenance personnel, schedules and budgets; asset management and work history using MAXIMO. The ability to lead a formal work planning process and manage maintenance contracts with local and overseas services providers. Also coordinates with the Plant Engineer and Reliability business centre for performance optimisation and defect elimination.

Applications are invited from candidates who can meet the following criteria:

- Previous experience with all aspects of power plant systems and maintenance programmes which provide the highest possible reliability and availability of generation plant and auxiliary systems. Experienced with computerized maintenance management systems (CMMS).
- Qualifications leading to Professional Electrical or Mechanical Engineer status or equivalent together with at least 8 years progressive experience in positions of responsibility in power generation, marine engineering, or relevant industry.
- Management style - a strong leader with excellent interpersonal, communication and people management skills who will actively participate in an evolving culture which encourages the contribution and involvement of all employees and partnership with the Electricity Supply Trade Union.
- A sound understanding of and experience with budgeting procedures. Responsible for expenditure and efficient cost control, including inventory, manpower and maintenance contracts.
- A willingness to participate in the training and development of staff.

Please apply in writing by Wednesday, December 5, 2012 to:
