

DiveTek

seeks a Diving Safety Officer & Technical Operations Manager

Major responsibilities include:

- Operational authority for all diving activities;
- Developing protocols for technical diving operations (mixed gas/CCR);
- Pilot vessels as required;
- Advise and assist dive teams in research diving methods and field operations;
- Maintain, inspect, and repair dive equipment and dive compressor ensuring all is within the proper operating parameters to provide a safe working environment for the divers

The successful applicant must have:

- A degree in a science related field;
- An internationally-recognized certification to technical instructor level in diving, CPR/firstaid & oxygen administration;
- A Bermuda "C" Class pilot's license;
- A minimum of five years experience in scientific diving and an active Scientific Diver certification as defined by the American Academy of Underwater Sciences;
- A thorough knowledge of diving theory, safety practices, operational procedures and diver training, as well as a broad technical and scientific expertise in research diving in compliance with AAUS standards;
- Certifications and experience servicing and inspecting regulators and scuba cylinders
