

Senior Architect (R.I.B.A., A.I.A., or equivalent) required for a new and exciting opportunity.

The successful applicant should have broad experience designing and managing a variety of project types including residential, commercial and hospitality projects.

Minimum qualifications and experience:

- A minimum of 8 years post registration experience;
- Proven competence in all phases of design and construction;
- Competence in AutoCAD as well as an ability to produce freehand sketches;
- Experience of preparing, presenting and guiding project documents through Planning and Building Control processing with a working knowledge of local and international Planning & Building Codes;
- Ability to lead multiple projects at once, have strong presentation skills and experience working directly with clients, local and international consultants, contractors and suppliers to the completion of projects; and
- Ability to guide and mentor junior staff members and encourage them in their career development.

Please respond in writing or email by 13 May, 2013 including a covering letter, your resume, samples of your work (max 5Mb) and references to:
