

## VRV HVAC Installation & Service Technician

Bermuda Air Conditioning Ltd. is seeking to employ a qualified VRV HVAC Installation & Service Technician. The successful candidate must be an experienced self-motivated individual with excellent interpersonal skills.

### Duties and Responsibilities

- Install, commission, service, and maintain Heating, Ventilating, Air Conditioning (HVAC) Systems, including Variable Refrigerant Volume (VRV) and Chilled Water Systems.
- Installation duties to include layout, installation, and pressure testing of refrigerant, water and condensation piping, plus control wiring and systems.
- Train and direct other HVAC technicians and apprentices in the installation and servicing of Daikin VRV systems.
- Work to tight deadlines on multiple projects, including overtime work when required.

### Required Qualifications and Experience

- A minimum of 8 years experience as a journey-person HVAC technician, installing and servicing split and packaged systems in both residential and commercial buildings.
- A minimum of 5 years experience installing and servicing Variable Refrigerant Volume (VRV) HVAC systems manufactured by Daikin.
- Proven experience in setting out, installing and commissioning air-conditioning equipment, with minimum supervision.

### Preferred Qualifications and Experience

- Must be able to work successfully with Architects, Engineers, other Contractors and Owners on major projects, alongside our highly motivated staff, in a professional manner.
- Excellent workmanship.

### Closing date: August 9th, 2013
