Our team shares a passion for providing exceptional service, innovation, creativity and a strong belief in the entrepreneurial culture which is a cornerstone of our competitive advantage.

AVP Specialty

The successful candidate will be responsible for actuarial and modeling of assumed risk in Specialty lines reinsurance. The role requires a strong actuarial and modeling background, as well as established broker client relationships.

Responsibilities include:

- Provide qualitative, numerical and actuarial analysis and modeling, concluding with recommendations on assumed Specialty lines (non-property catastrophe) risks. This will include, but will not be limited to, the General Liability, Excess Casualty, Umbrella, Professional Liability, Specialty, Casualty, Surety, Aviation, Political Risk, Trade Credit, Accident & Health, and Whole Account business
- Investigate, evaluate, make recommendations for and implement current and new Specialty lines pricing tools and risk evaluation models to assess risk on a probabilistic basis
- Communicate results effectively to underwriters and senior management
- Support the maintenance of key relationships with clients and brokers of property, casualty and specialty reinsurance; interaction with clients and brokers will be required
- Apply proficient use and knowledge of systems to effectively extract, manipulate and report on modeling information regarding the assumed Specialty lines portfolio
- Create and expand modeling tools involving spreadsheet and database applications, as well as keep abreast of industry trends for actuarial analysis and risk modeling

Education, Skills & Experience:

- A university degree essential with emphasis on economics or mathematical probabilities; statistics techniques or simulation desirable; advanced scientific degree advantageous

- A minimum of 8 years' experience in progressively senior analyst and modeling roles at a leading reinsurer or broker
- Professional actuarial designation required (e.g. ACAS, FCAS)
- Detailed knowledge of worldwide insurance and reinsurance markets along with depth of knowledge and expertise in a number of specialty reinsurance lines
- Excellent understanding of reinsurance products, coverages and markets
- Detailed knowledge of actuarial methods including trending, loss development, fitting of loss distributions, frequency/severity modeling, modeling techniques and (re)insurance data sources; proficient knowledge of probability and statistics
- Experience managing business relationships within the reinsurance underwriting and brokerage community
- A thorough understanding of computer systems and applications
- Proficiency in the Microsoft Office suite of tools as well as additional programs such as @Risk; SQL
- Excellent analytical, communication and interpersonal skills

This is a fast-paced business environment, demanding a strong work ethic and a results-oriented approach.

Written applications with Curriculum Vitae should be forwarded via e-mail to careers@renre.com or to VP Human Resources and Administration, Renaissance House, 12 Crow Lane, Pembroke HM19.
