

Ocean Ltd. Requires Skilled Carpentry: Site Supervisor

Job Summary: Responsible for supervising workers and projects on site, coordinating and scheduling activities, training or arranging for training, ensuring adherence to safety standards, and organizing setting up and take down of equipment. The Site Supervisor may also be responsible for preparing reports, estimating material and labour costs.

Applicant must demonstrate experience in all aspects of finished carpentry work in the installation of high quality finished millwork (doors, frames, cabinets, etc)

Key Job requirements and experience:

- A minimum of 7 years' experience in all aspects of finished carpentry including joinery
- Ability to supervise a team of people to ensure projects are completed within time and budget
- Construction of cabinets, doors, windows, frames, moldings and trim
- Competence with all necessary machinery and tools
- Attention to detail is a must

Applicants must be able to work under pressure to tight timelines and to complete projects on schedule. Must be willing and able to work weekends and public holidays on demand as required, based on the client's schedule.

Please send resume with at least two employment references that supports work history, excellent attendance and a positive team attitude to belinda.wright@conyersdill.com or mail to P.O. Box HM 666, Hamilton HM CX no later than 11 October 2013.
