Reliability Engineer

Bermuda Electric Light Company Limited (BELCO) invites applications from suitably qualified and experienced individuals for the position Reliability Engineer. The Reliability Engineer is responsible for establishing and improving strategies to extract maximum profits from BELCO's assets. The post holder will act as a technical resource person to ensure plant reliability and improvement. They will also provide engineering advice, training and technical support for asset management and maintenance strategies.

Key Job Responsibilities:

- Lead Root Cause Failure Analysis on plant failures and unplanned events
- Manage projects and develop procedures to improve reliability
- Offer direction to Quality Control and Quality Assurance processes
- Facilitate periodic review of maintenance strategies
- Oversee the approval process for changes to asset management business strategy
- Maintain asset management and work planning data in CAMS (e.g. Maximo)
- Analyze the downtime and loss reporting system to provide insight into areas of improvement
- Introduce leading edge solutions to maintenance and reliability teams
- Liaise with suppliers and contractors regarding reliability

Key Job Requirements:

- Mechanical or Electrical Engineering degree from a recognized University or equivalent qualification, satisfying the requirement for registration as a professional or chartered engineer
- Minimum of 7 years professional experience with 5 of those years in the reliability engineering field
- Strong experience in leading Root Cause Analysis workshops from conception to conclusion
- Experience in operations, maintenance and trouble-shooting of power generation and distribution systems
- In-depth knowledge of plant operations and assets management
- In-depth knowledge of applicable engineering Codes, Standards and Regulations
- Working knowledge of Government Health & Safety legislation and regulations
- Strong problem solving skills with ability to collect, collate and analyze data, identify problems, determine root cause and make decisions and recommendations
- Strong technical skills demonstrating a clear understanding and comprehension of plant operations, maintenance and asset management
- Good planning, organizational and time management skills
- Strong interpersonal skills with ability to liaise with contractors, suppliers and BELCO employees at all levels
- Good written and verbal communication skills
- Willingness to participate in the training and development of staff
