

On behalf of our client, **Oxygen Ltd.**, we are seeking a

## Server Support Engineer

### SUMMARY OF POSITION

Experienced Server Support engineer required to work as part of our technical and outsourcing team supporting predominantly Microsoft platforms running on VMware environments. This position will be supporting our financial services customers onsite so previous experience of working within a regulated financial environment is required. Candidates should have strong analytical and problem solving skills as well as being calm and focused within a pressured environment.

### Core skills and experience required

- Strong 3rd line Windows Server (2003/2008/2012) background.
- Experience of working with secure and critical infrastructures (Banking/Finance)
- Strong Active directory and Group Policy administration
- Microsoft Exchange support in a multi-server corporate environment
- Microsoft SQL Server support (write/edit queries)
- Knowledge of Terminal Server and thin client technologies
- Strong organisation and customer facing skills
- Experience working under change control
- VMware ESX setup, administration and troubleshooting
- Proven ability to document processes, procedures and solutions

### Qualifications

- Minimum 5 years in similar position.
- Microsoft MCSE or MCITP (required)
- VMware VCP or equivalent (required)
- Cisco CCNA (preferred)
- Degree educated (preferred)

### Additional skills and experience preferred

Self-motivated with a proven track record in Microsoft and Cloud technologies and comfortable in the dynamic atmosphere of a technical organization with a rapidly expanding customer base. Candidate should be organized and analytical, adept at working in a team environment, able to work within a project schedule, and able to handle multiple priorities. Additionally, any experience in the following technologies an advantage: VMware View, Veeam B&R, Exagrid, Application packaging (preferably Thinapp), Nutanix
