## Analyst

Reporting to the Senior Analyst, the Analyst will be responsible for analysis, modeling and underwriting recommendations of assumed risks. The successful candidate will also provide support for internal model development.

### Responsibilities include:

- Analyze, model and provide recommendations on assumed primary, facultative and retrocession catastrophe excess of loss submissions, capital market transactions and non-catastrophe risks
- Investigate, evaluate and make recommendations for improvements to current and new catastrophe models
- Build and maintain relationships with catastrophe model vendors and oversee the implementation of new models when necessary
- Use internal systems (e.g. REMS, Doris, GPS, etc.) to effectively extract, manipulate and report on modelling information regarding assumed portfolio for loss analysis

### Education, Skills & Experience:

- A university degree with an emphasis on science, engineering, economics, math, statistical techniques or simulation essential. An advanced degree in hard sciences or MBA preferred
- Experience at a re/insurer, reinsurance broker or a vendor catastrophe modelling firm is advantageous but not required

- Strong computer skills including advanced knowledge of Excel and SQL is required
- Excellent mathematical, statistical, problem-solving and data management skills
- Superior written, verbal and interpersonal communication skills
- Ability to work collaboratively within a team environment
- A willingness to express a point-of-view and receive feedback from others
- Ability to multi-task in a timely, accurate manner and provide feedback in a fast-paced underwriting environment
- Intellectually curious
- A strong work ethic

This is a fast-paced business environment, demanding a strong work ethic and a results-oriented approach.
