

Our people are our competitive advantage.

At Butterfield, we pride ourselves on being approachable, disciplined and proactive. If you embody these qualities and have the necessary experience, you may be the one we're looking for.

Testing Analyst (Bermuda/Cayman) Group Technology

This position reports to the Senior Change, Release and Testing Analyst and is responsible for the planning, design and deployment of effective test suites and regimes for product development, software application development, information system launches, and operations systems enhancements.

Your responsibilities will include:

- ensuring that testing activities will allow applications to meet business requirements and systems goals, fulfilling end-user requirements and identifying and resolving systems issues
- collaborating with analysts, designers and system owners in the testing of new software programmes and applications
- ensuring that any new software integration into company systems meets functional requirements, system compliance and interface specifications
- contributing to pre-testing phase of project development by evaluating proposals in order to identify potential problem areas and making the appropriate recommendations
- evaluating, planning, designing, developing, improving and deploying testing techniques for new applications, products and/or enhancements to existing applications throughout their development/product lifecycles
- creating and executing test scripts, cases and scenarios that will determine optimal system performance according to specifications within budget
- analysing formal test results in order to discover and resolve defects, bugs, errors, configuration issues and interoperability flaws
- communicating test progress, test results, and other relevant information to project stakeholders and management

Your experience/skills should include:

- University degree in software engineering or computer science and/or three or more years equivalent work experience
- proven experience in overseeing the design, development and implementation of software testing solutions
- strong knowledge of system testing and software quality assurance best practices and methodologies
- good project management skills and/or substantial exposure to project-based work structures
- working knowledge of database concepts, data security and heterogeneous computer systems
- excellent interpersonal and communication skills
- familiarity with HP Quality Centre, Test Director, Quick Test or other testing support systems
- experience using FlexCube banking applications would be an asset
- proficiency in Microsoft Office suite of applications

CLOSING DATE: 19 August 2015

All applications should be forwarded **via e-mail** to: resumes@butterfieldgroup.com

ATTENTION: Human Resources

Hardcopy applications will not be accepted.
