Heavy Equipment and Ground Support Equipment Mechanics

Permanent

Renaissance Aviation requires the services of experienced mechanics to troubleshoot, repair, and service both Ground Equipment used in an airport environment, and Heavy Construction Equipment. This is in a busy, mission critical operation with possible call outs 24 hours a day.

Requirements

- Heavy equipment mechanical experience to expert level
- Ground Support Equipment experience to expert level
- Diesel/Gas engine repair and maintenance to expert level
- Advanced or expert level knowledge of electrical and hydraulic systems
- Ability to weld and fabricate
- Must be willing to work overtime when necessary
- Must have own transportation
- Minimum of 10 years' experience

Interim

Requirements

- Heavy equipment mechanical experience to intermediate level
- Ground Support Equipment experience to intermediate level
- Diesel/Gas engine repair and maintenance to intermediate level
- Intermediate level knowledge of electrical and hydraulic systems
- Ability to weld and fabricate, painting and bodywork
- Must have own transportation

Interested candidates can forward a covering letter and resume to hr@eegroup.bm by 23 October 2015
