

## Senior System Engineers

We are seeking self-motivated individuals to join our professional services and support team. Responsibilities will include installation, consultation, support and maintenance of networks primarily designed around Microsoft products running on HP hardware, in many cases with a virtualization layer in between. Knowledge of these, together with solid enterprise networking experience (LAN, WAN and security), will be necessary for the successful candidates.

Proven knowledge of Microsoft, Virtualisation (VMWare, Hype-V), Cisco, Extreme Networks (Enterasys) and Checkpoint is required. A minimum of ten (10) years of experience, together with at least two of the following certifications: Microsoft MCSE (+Messaging), Cisco CCNP/CCDA, Extreme Networks (Enterasys) ESE or Citrix CSA is also required. The candidates must have a history of customer service excellence and a commitment to continuing education and training. To blend in with our very successful support team, you will need to have the desire to work with leading edge technology in a very motivating and demanding environment. Knowledge of VOIP messaging, specifically Shoretel would be a distinct asset.

An excellent salary and benefits package will be offered to the right individuals. Applications, accompanied by a resume and references should be forwarded to:
