Ministry of Public Works

Department of Works and Engineering

INVITATION TO TENDER

Prospect Water Depot Remote Monitoring System

The Government of Bermuda, Ministry of Public Works, through the Department of Works and Engineering (DWE) is presently soliciting tenders from qualified engineering firms and individuals to design and install a remote monitoring system for the Prospect Water Depot. This work involves providing and installing instrumentation together with the provision of a Scalable Remote monitoring system that will enable the client to connect to and manage Water installations, machines and devices via the Internet. The solution shall be a web-based data acquisition, control, alarming, and management platform. Users shall have the ability to access, analyze, and export all monitoring data from various sources within the system.

Full details and the invitation to tender may be obtained from the Bermuda Government Procurement website (www.opmp.gov.bm), under Procurement Notices.

Completed submissions must be returned no later than 11 January 2016 at 3:00 p.m. to the address below bearing the following identification:
