

Our client – Biotech Research, BV invites applications for the position of:

Senior Project Manager

A new biopharmaceutical company founded by a group of established institutional investors is seeking to hire a Senior Project Manager for its Bermuda office.

The company has certain flexibility as to the professional background from which candidates may come. As a result, we would be pleased to actively consider suitably qualified, highly motivated, candidates with transferable, synergistic, experience gained in, for example: the Life / Health insurance sector; pharmaceutical industry; manufacturing; or process development.

Position Overview

The Senior Project Manager will provide organisational, operational and project management expertise to the company. Specifically, the Senior Project Manager will coordinate the company's contract service providers and the clinical development and manufacturing activities for the company's product candidates.

Job Functions

- Coordinate and manage the execution of all company projects;
- Coordinate the development and implementation of the company's clinical trial and regulatory strategies for its product candidates;
- Coordinate and manage internal personnel, contract service providers and clinical trial investigators to ensure compliance with good clinical practice;
- Liaise with contract research organizations and contract manufacturing organizations in support of clinical development programs;
- Coordinate and manage office operations, including adherence to budgets established in concert with the Board of Directors;
- Coordinate clinical studies and provide timely updates to the Board of Directors;
- Assist with the development and prosecution of intellectual property portfolio; and
- Coordinate the preparation of regulatory documents, including investigational new drug applications and new drug applications.

Requirements (Knowledge & Skills)

- Bachelor of Science degree in a scientific or healthcare discipline;
- Minimum of 7 years of overall professional experience in the biotechnology or pharmaceutical industry;
- Excellent organisational management skills;
- Experience with clinical trial management, drug manufacturing and process development;
- Knowledge of FDA regulatory requirements;
- Ability to solve problems and work independently; and
- Excellent written and oral communication skills.

Interested persons should apply by sending a resume in confidence to:
