

SENIOR COMMERCIAL ELECTRICIAN

We are seeking a fully qualified candidate who will be responsible for installing, maintaining, repairing and troubleshooting the electrical, EMS and computer functions of the Company's electrical equipment including building automation, refrigeration, fire alarms, security and lighting integration.

Duties and Responsibilities

- Plan, layout, install and maintain a variety of electrical equipment including EMS and process controls, panels, relays, circuit breakers, UPS and refrigeration racks.
- Troubleshoot and repair above.
- Keep immediate supervisor up to date on all on-going projects, with regards to project status, completion time projections documentation and any problems that may have arisen during the course of the project.
- Maintain and present records on work performed.
- Perform miscellaneous job-related duties as assigned.
- Available to work weekends and public holidays in a busy seven days a week operation where installation and maintenance work is routinely done after hours.

Skills, Qualifications & Experience Required

- Recognized electrical degree and National Training Board license.
- Certificate of competency from industry standards such as NJATC.
- Minimum of five (5) years post apprenticeship experience as an electrician in these capacities.
- Experience in commercial and industrial installations.
- Generator and UPS commercial grade installation.
- Computer network cabling linking network and EMS controls.
- Ability to analyze and map current electrical systems.
- Knowledge of EMS refrigeration system wiring.
- Ability to read, follow and revise electrical diagrams and EMS ladder logic.
- Good time keeping / time management skills.
- Ability to adjust to changing priorities and work well under pressure.
- Excellent interpersonal and communication skills.
