

The Ascendant Group Limited, which is a publicly traded investment holding company, invites applications for the position of

Information Security Manager

Job Description: The Information Security Manager is responsible for bringing the organization's information security risks under explicit management control. The post holder assists in the development and attainment of the strategic direction for information security with others in the Information Technology group.

Key Responsibilities include but are not limited to:

- Assist in the development of IS governance (includes physical security/facilities, risk management and compliance) on information security matters such as routine security activities plus emerging security risks and control technologies
- Assist in the preparation and implementation of information security policies, standards, procedures and guidelines
- Develop and lead the information security awareness training and good practices
- Provide assistance on information security risk and control matters throughout the organization
- Lead the design and operation of compliance monitoring and improvement activities to ensure compliance both with internal security policies etc. and applicable laws and regulations
- Lead the design, implementation, operation and maintenance of the Information Security Management System based on the company's standards (ISO/IEC 27000 series)
- Lead information security risk assessments
- Manage information security risk efficiently and effectively
- Lead activities relating to contingency planning, business continuity management and IT disaster recovery in conjunction with relevant functions and third parties
- Analyze reports generated by the monitoring system to identify trends that might indicate a future risk
- Stay abreast of current trends, technologies, regulations, threats, etc. and provide direction and support to the various IT groups

Key Job Requirements:

- BS Degree in Computer Science/Information Systems or equivalent related degree or work experience
- Professional certifications (CISSP, CISM, etc.) required
- 5+ years work experience in Information Security Management and/or related functions (such as IT audit and IT Risk Management)
- Strong understanding and knowledge of networking and network protocols
- Strong understanding and knowledge of industrial systems
- Excellent knowledge of system and web application security, including mobile security
- Solid background in technical IT roles such as IT architecture, development or operations, with a clear and abiding interest in information security
- Good understanding of programming and scripting languages
- Excellent analytical and problem-solving abilities to identify and fix security risks
- Excellent communication and presentation skills

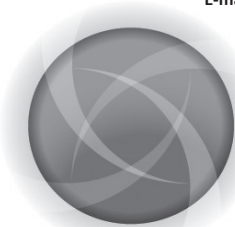

All qualifications and certifications should be submitted with application.

Application deadline: Thursday, March 31, 2016
