

AES Engineering and Contracting Ltd.

Project Manager for Solar Installations

Applications are invited for the position of Project Manager for Solar Installations at AES Engineering and Contracting Ltd. The successful applicant will report directly to the CEO and will be responsible for the planning and implementation phases of residential and commercial solar installation projects for both retrofit installations and new builds. Tasks will include, but are not limited to, establishing materials lists, procuring materials, staging the project, masonry work, electrical sizing and completing installations to NEC code, testing and commissioning of solar installations, and troubleshooting solar installations. The successful applicant will also be responsible for the development and training of team members through instruction, supervision and mentoring.

Applicants must be certified in the installation of SunPower Residential Systems and have at least 2 years' experience working in all aspects of solar (residential and commercial) installations, including the ability to take an installation project from the planning phase, through build out/implementation and finally commissioning; the ability to organize jobs and lead team members while working with minimal supervision, the ability to develop and maintain good working relationships across all levels of the organization and with clients and prospective clients. The job entails a significant amount of physical activity, including traversing and/or working on ladders and rooves, and therefore the successful applicant must be able and willing to work on structures of varying (often very high) heights.

Please apply in writing to AES Engineering and Contracting Ltd., P.O. Box HM 1859, Hamilton HM HX, Bermuda, Attention: Tim Madeiros, or via e-mail to info@aes.bm enclosing your Resume detailing your experience and qualification, together with copies of all certifications you possess by May 13th, 2016. Tel: 505-0804
