

MULTIMEDIA ENGINEERING DESIGNER

Our client AMBIENT ECHO-UTOPIA ARTS LIMITED is seeking an experienced and motivated Multimedia Engineering Designer.

The ideal candidate is expected to have a skillset based on a minimum of ten years professional working experience primarily in the field of sound and to possess a strong related academic foundation.

The ideal candidate must be well versed in multi-instrumental composition and possess master level command of digital audio workstations including Logic Pro X, Pro Tools as well as analogue and digital consoles and equipment.

A command of various visual fine arts mediums including motion picture, photographic, architectural, textile, interior, fashion, and graphic design skills will be an asset.

The successful candidate will be required to record and mix engineering production for top tier International recording artists, create sound designs and soundtracks for film, theatre, and fashion, actuated front of house mixing and sound reinforcement for live concerts and theatre.

Flexible schedule should be expected, as workload will depend on projects.

Please apply in writing (by post or email) and include a detailed resume and references to:-
