

## INFLATION FALLS

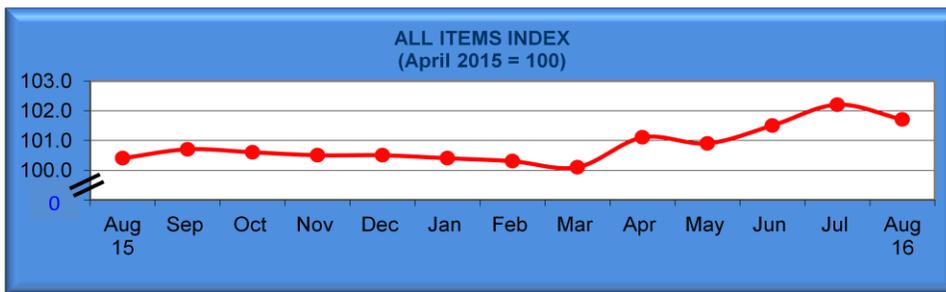

Consumers paid 1.3 per cent more in August 2016 than they did a year ago for the basket of goods and services included in the Consumer Price Index (CPI). The level of inflation fell 0.3 percentage points from the 1.6 per cent measured in July 2016.

Between July 2016 and August 2016, the average cost of goods and services in the CPI decreased by 0.5 per cent. The all-items index dropped to 101.7 in August. This means that the basket of goods and services that cost \$100.00 in April 2015 now costs \$101.70.

## YEAR-TO-YEAR ANALYSIS

The Education, Recreation, Entertainment & Reading sector was the largest contributor to the year-over-year change, increasing 4.1 per cent.

In addition, the Health & Personal Care sector and the Rent Sector also impacted significantly the year-over-year increase. These sectors rose 3.6 and 1.4 per cent, respectively.

**Inflation Rate**  
**1.3%**

The compilation of the CPI involves the processing of several thousand price quotations. The Department of Statistics wishes to acknowledge the cooperation of the business community in supplying the required price data.

SUMMARY STATISTICS					
Period	Monthly		Period	Quarterly	
	Index	Annual per cent Change		Index	Annual per cent Change
<b>2015</b>			<b>2014</b>		
Aug	100.4	+1.4	Q1	97.5	+1.8
Sep	100.7	+1.0	Q2	98.5	+2.0
Oct	100.6	+0.6	Q3	99.1	+2.1
Nov	100.5	+1.4	Q4	99.3	+2.2
Dec	100.5	+1.8			
<b>2016</b>			<b>2015</b>		
Jan	100.3	+1.7	Q1	98.9	+1.5
Feb	100.2	+1.3	Q2	100.2	+1.7
Mar	100.1	+1.0	Q3	100.6	+1.5
Apr	101.1	+1.1	Q4	100.5	+1.2
May	100.9	+1.1			
Jun	101.5	+0.8	<b>2016</b>		
Jul	102.2	+1.6	Q1	100.2	+1.3
Aug	101.7	+1.3	Q2	101.2	+1.0

**MONTH-TO-MONTH ANALYSIS**

**Food**

The Food sector inched up 0.1 per cent in August following a 0.3 per cent rise in July. Key contributors to the increase were fresh steaks (5.2 per cent), salad dressing (3.5 per cent) and fresh and frozen pork loin (2.6 per cent).

**Rent**

The Rent sector increased 0.1 per cent in August, after a 1.0 per cent rise in July.

**Household Goods, Services & Supplies**

The Household Goods, Services & Supplies sector was static in August. The average cost of detergents and bleaches rose 0.6 per cent but was offset by an equal decrease in the average cost of food wraps and trash bags.

**Tobacco & Liquor**

The Tobacco & Liquor sector was static for the second consecutive month. There were no changes in the average cost of beer, wines, spirits or tobacco.

**Clothing & Footwear**

After a 0.1 per cent increase in July, the Clothing & Footwear sector was unchanged in August.

**Health & Personal Care**

The Health & Personal Care sector was static for the second consecutive month.

**Fuel & Power**

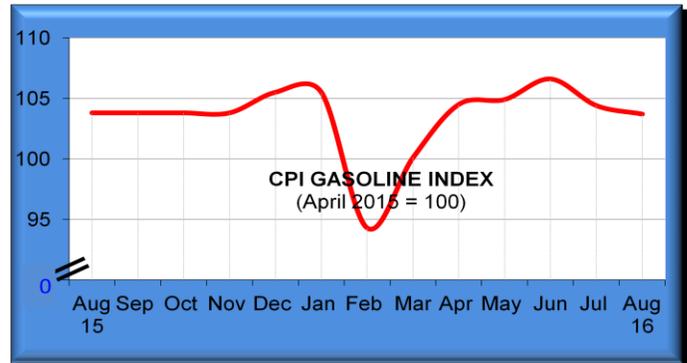

There was no movement in the Fuel & Power sector as the fuel adjustment rate remained the same as July.

**Education, Recreation, Entertainment & Reading**

The Education, Recreation, Entertainment & Reading sector was unchanged at the sector level in August. However, the average cost of pet upkeep increased 0.1 per cent while the average cost of premium fuel declined 0.7 per cent.

**Transport & Foreign Travel**

The Transport & Foreign Travel sector fell 4.3 per cent in August, following two months of increases. The average cost of air fares decreased 13.7 per cent month-over-month while overseas accommodation fell 5.3 per cent.

**COMPUTING PRICE INCREASES**

The Department of Statistics receives calls daily requesting the rate of inflation over specific periods of time. The following calculations are provided to guide users as to how to compute rates of price increases. The monthly index numbers can be obtained from our website [www.gov.bm](http://www.gov.bm).

**A) Month-to-Month Price Change**

The price change between November and October, 2015 is calculated as follows:

$$= \frac{\text{Nov 15 index} - \text{Oct 15 index}}{\text{Oct 15 index}} \times 100$$

$$= \frac{100.5 - 100.6}{100.6} \times 100$$

$$= -0.1\%$$

**B) Year-to-Year Price Change**

The price change between December 2015 and December, 2014 is calculated as follows:

$$= \frac{\text{Dec 15 index} - \text{Dec 14 index}}{\text{Dec 14 index}} \times 100$$

$$= \frac{100.5 - 98.7}{98.7} \times 100$$

$$= 1.8\%$$

**C) Particular Period Price Change**

The price change between April 2014 and January, 2016 is calculated as follows:

$$= \frac{\text{Jan 16 index} - \text{Apr 14 index}}{\text{Apr 14 index}} \times 100$$

$$= \frac{100.3 - 98.3}{98.3} \times 100$$

$$= 2.0\%$$

## WHAT IS THE CONSUMER PRICE INDEX?

The Consumer Price Index (CPI) is a statistical tool used for measuring changes in the general level of prices of consumer goods and services purchased by private households.

The index measures price movements of a given quality and quantity of goods and services. The mix of these consumer goods and services comprising the index, are figuratively thought of as a “shopping basket.” In constructing this “shopping basket”, the selected goods and services are organized first by commodity type. They are then divided into sub-components and assigned to a major expenditure group. The Bermuda CPI is structured into nine expenditure groups or sectors:

- Food
- Rent
- Clothing & Footwear
- Tobacco & Liquor
- Fuel & Power
- Transport & Foreign Travel
- Household Goods, Services & Supplies
- Education, Recreation, Entertainment & Reading
- Health & Personal Care

## CONCEPTS AND DEFINITIONS

### Base Period

The time period which is used as a reference point for measuring the price change of goods and services. The base period for the Bermuda CPI is April 2015.

### Price Index Number

A single figure that shows how a set of prices has changed over a specified period of time. An index number on its own means nothing. It must be compared with an index number from another period to have meaning. For example, a comparison of the index number 97.2 for January 2014 with 100.4 for January 2016, reveals that prices have increased by 3.3 percent.

### Laspeyres Equation

The CPI is computed using this statistical equation. This formula calculates the total amount of money a household needs today to purchase the same basket of goods and services that it bought in the base period, April 2015.

## WEIGHTED AVERAGE

A mathematical formula that takes into account the relative importance of an item’s price change compared to the overall change in the sector or CPI.

### Inflation

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given sum of money.

### Cost of Living Index

Many individuals refer to the CPI as a cost-of-living index. The CPI is an index of pure price change only. A cost-of-living index reflects the changes in buying or consumption patterns that consumers would ordinarily make to adjust to any change in the price of a good or service.

### A COMPARISON OF RATES OF INFLATION (%) Selected Countries & Bermuda

	2012	2013	2014	2015	Aug 16
<b>Bermuda</b>	2.4	1.8	2.0	1.5	+1.3
<b>United States<sup>1</sup></b>	1.7	1.5	0.8	0.7	+1.1
<b>Canada<sup>2</sup></b>	1.5	0.9	2.0	1.1	+1.1
<b>United Kingdom<sup>3</sup></b>	3.2	3.0	2.4	1.1	+1.8
