

# We're hiring

## IT Infrastructure Senior Manager ●

We are seeking a highly motivated Senior Manager in Information Technology (IT) to be responsible for crafting, communicating, and executing the strategic vision of our regional IT while ensuring optimal performance for day to day activities and projects.

**Primary responsibilities will include but are not limited to the following:**

- Architectural design and long term, strategic deployment of servers, storage, and services at the datacentre and across multi-national jurisdictions.
- Cisco UCS / VMWare virtualized infrastructure design, planning, implementation and maintenance with Riverbed VSP and Granite technologies.
- Tegile and enterprise class SAN storage resource planning and monitoring of KPIs and environment monitoring (power, cooling etc.).
- Multi-regional Cisco routing and switching architectural design, planning, implementation, maintenance, and monitoring of KPIs.
- Regional networking and communications infrastructure of highly available VPN, WAN, MAN, and LAN implementations including architectural design, planning, and monitoring of KPIs.
- Regional and local wireless networking architectural design, planning, implementation, maintenance, and monitoring of KPIs.
- Stonegate firewall architectural design, planning, implementation, maintenance, and monitoring of KPIs.
- Server and service monitoring and server resource planning and monitoring of KPIs using Paessler PRTG and Microsoft SCOM.
- Financial management including planning, budgeting, forecasting, and IT benchmarking.
- Monitor staff utilization and capacity, staff contingency planning and staff forecasting and modelling, recruitment, onboarding and succession planning.
- Manage external client relationships, engagement management and business development.
- Provision consulting services to external clients.

### **Qualifications and Requirements:**

- Bachelor's degree or equivalent in a computer or information systems related field is required. An advanced degree is an asset and desired.
- Recognized relevant professional qualification required such as Cisco, Microsoft, VMWare, or other infrastructure or security related certifications, etc.
- Minimum of 7 years' experience in IT management and service delivery for one or more of the following areas: Active Directory and Messaging, Enterprise Management systems, Change and Release Management.
- Proven experience in financial management principles as they relate to IT budget planning.
- Ability to work well within a diverse cross-functional team, manage multiple IT Resources, and adapt to frequent change.
- Advanced problem solving skills and the ability to work collaboratively with other departments to resolve complex issues with innovative solutions.
- Ability to quickly develop an understanding of client's business and need.
- Ability to coach, mentor, and develop team members.
- Excellent leadership, organizational and time management skills.
- Ability to develop and cultivate relationships with people at all levels of an organization.
- Excellent working knowledge of MS Office: Outlook, Word, Excel, PowerPoint, Project, and Visio.
- In depth knowledge in these areas: IT strategy, IT transformation, IT operations, and IT optimization.
