

Expertise

Group Chief Actuary and Group Chief Risk Officer

Are you looking for an exciting opportunity within a new-start up organisation? Monument Re Limited ("Monument") is a newly incorporated Company, Group Supervised in Bermuda, specialising in life reinsurance. They currently invite applications for the roles of Group Chief Actuary and Group Chief Risk Officer, both of which will report to the CEO. These are exciting and unique opportunities to be part of a start-up company, capitalizing on the fast-growing life reinsurance industry in Bermuda.

Group Chief Actuary

As Group Chief Actuary, the incumbent will provide critical support to the commencement of Monument's business, while liaising regularly with both internal and external stakeholders. Duties will include leading the production, analysis, and documentation of actuarial reporting and transaction pricing, while also playing a fundamental role in profitability analysis, financial planning, reinsurance strategy and experience analysis. The incumbent will also take responsibility for on-going review and documentation of regulatory reporting changes.

Minimum Required Qualifications, Skills and Experience:

- Bachelor's degree, preferably in Actuarial Sciences, Mathematics, or Statistics
- FIA qualification
- Minimum of 10 years experience in the life reinsurance industry
- Significant actuarial experience in life industry reporting and pricing, ideally with exposure to Solvency II and the EBS in Bermuda, as well as pricing of portfolio transactions
- Proven ability to work under pressure and meet tight deadlines
- Expert actuarial technical and presentation skills

Group Chief Risk Officer

The critical Group Chief Risk Officer role will make a significant contribution to the development of Monument's business while liaising regularly with internal and external stakeholders. CRO duties will include continued development and implementation of an effective risk management framework and responsibility for compliance and related reporting. The individual will develop the Risk Management framework incorporating shareholders risk appetite and embed the framework to enable better strategic decisions through effective analysis of risk versus return. This includes ensuring that the risk agenda reflects the most important existing and emerging risks and providing timely and robust analysis to support decision-making.

Minimum Required Qualifications, Skills and Experience:

- Bachelor's degree required; advanced degree and/or qualifications (i.e., MBA, CPCU/ACII, ARe) preferred
- FIA qualification
- Minimum of 10 years of reinsurance experience required; life reinsurance experience would be advantageous
- Considerable risk management experience in the life industry ideally also with previous exposure to some or all of capital management, pricing of transactions, investment management and reporting in the life industry setting.
- Excellent communication skills, both verbal and written
- Proven ability to work under pressure and meet tight deadlines
- Capability to present technical results clearly and concisely, particularly to non-technical audiences
