IaaS Engineer

QuoVadis Services Ltd. is a growing Bermuda based IaaS Provider with technology centres based in Bermuda, Netherlands and Switzerland. The Bermuda office requires an IaaS Engineer to manage a broad range of infrastructure technologies including compute, storage, networking and virtualization platforms. The successful incumbent will operate as a senior engineer and technical resource to implement, maintain and troubleshoot local systems and will conduct remote support for overseas platforms.

Duties and Responsibilities will include:

- Ensure technical integrity of the overall IaaS platform
- Manage local computer and storage platforms based on x86 architecture, SSD SAN storage, and VMware virtualization
- Support a network infrastructure environment comprised of switches, routers, firewalls, intrusion protection systems, and internet security systems
- Provide solutions-based troubleshooting for complex platform issues, including end-user support as necessary
- Remain current with industry and product information to provide recommendations and necessary systems software and firmware updates
- Other projects and ad hoc duties as may be assigned

Minimum Qualifications, Skills & Experience:

- Bachelor's Degree in Computer Sciences or equivalent work exposure and focus
- 7 years hands-on systems/network engineer experience with at least 5 years as a senior technical resource
- Experience working in a service provider environment and supporting carrier class service
- ESX certification or demonstrated experience managing virtual machines with VMware Sphere technologies including support of VMware vSphere 5.x
- Strong knowledge of networking including Cisco CLI and the design and configuration of layer 2/3 networks (VLAN, routing, BGP support and switching)
- Firewall and IPS systems exposure including policy management, site to site vpn, mobile vpn configuration, log inspection, and interpretation (Stonegate preferred)
- Experience with OpenSource technologies and Unix/Linux required, and NexentaStor or other SAN storage required
- Strong shell/Python/Ruby/Perl scripting skills required
- Proven ability to manage multiple projects and competing priorities
- Self-starter and self-researched
- Ability and willingness to work extended hours (including holidays and weekends), and business travel, when required
- Experience writing or contributing in infrastructure automation and management projects is preferred

Interested? Please email jobs@expertise.bm.

All enquiries will be dealt with in strict confidence.

Closing Date: **June 30, 2017**
