

Senior Actuarial Analyst and Bermuda Catastrophe Modeling Manager

Job number: 14002399

Close Date: September 21, 2017

We invent the new to help the world move forward. Combining powerful analytics and deeper insights with bigger ideas and innovative solutions, we free up our clients' potential, thereby fulfilling our own. Take it seriously. Make it fun. Know it matters.

MAXIMIZE your opportunity

XL Catlin invites applications for the position of Senior Actuarial Analyst and Bermuda Catastrophe Modeling Manager. This position is responsible for the management of the XL Catlin (Re) catastrophe modelling function and responsible for supporting the Segment Head of Catastrophe Modeling with portfolio aggregation/analytics and NOCM reporting.

What will your essential responsibilities include?

- Manage Bermuda Property Catastrophe Model team. Team responsibility includes individual submission modeling, portfolio analyses, and developing department knowledge of modeling science and technology.
- Work with Segment to enhance portfolio analytics incorporating company's views of risk while considering new technologies.
- Support the underwriting teams with catastrophe modeling expertise including managing the submission work flow, actively contributing to the on-going development and improvements to the catastrophe modeling process and tools. This will involve improving the work flow, managing catastrophe modelers, and training junior modelers.
- Assist the Segment Head of Cat Modeling with aggregation of the cat portfolio and liaise with ERM to meet segment reporting requirements and assist with providing accurate and timely portfolio information to retrocessionaires and trading partners as required.
- Provide analysis and reporting support to Alternative Capital Management as required including portfolio building, fund reporting, sensitivity analysis etc.
- Pricing analyses and catastrophe modelling for individual account submissions as required during peak times.

UNLEASH your potential

We're looking for someone who has these abilities and skills:

- Bachelor's degree (B.A.) from an accredited four-year college or university in sciences.
- At least 5 years of re/insurance experience; catastrophe modeling experience with RMS/AIR environments.
- Clear understanding of portfolio analytics is a plus.
- Working towards an actuarial designation; nearly qualified would be an advantage.
- Good interpersonal/communication skills with the ability to work in a team environment.
- Proficient in the use of Excel and Word.
- Experience with SQL, MS Access or other database software would be an advantage.
- Must be able to work longer than the normal work week during busy renewal periods.
