Join a world-class organisation

Chubb Tempest Life Re (CTLR) invites applications for the position of **Vice President and Head of Data Management**. The position reports to the Chief Underwriting Officer, Chubb Tempest Reinsurance Ltd.

With operations in 54 countries, Chubb is one of the world's largest multi-line property and casualty insurers.

Duties and responsibilities include, but are not limited to:

- Analysis and reporting of risk components through development and maintenance of stochastic simulation models
- Supporting other aspects of the life reinsurance business, including financial modelling, pricing, experience studies, and performing sensitivity testing
- Supervising and mentoring analysts that report directly to this position
- Responsibility for the development and maintenance of data warehouse to store and administer variable annuity policyholder data, and the development and production of standard and ad hoc data reports
- Developing and maintaining of experience studies including lapse and annuitisation
- Supervising the development of a claim verification protocol for variable annuities
- Reviewing and approving traditional life reinsurance claims
- Maintaining all software/systems specific to Chubb Tempest Life Re (SQL/data warehouse, MoSes, Barrie & Hibbert, TAI for traditional life block) and acting as CTLR connection with corporate IT

Qualifications and experience:

- Undergraduate or graduate degree in Mathematics, Finance, Economics or Actuarial Science
- A minimum of seven years' experience building actuarial models for U.S. life (re)insurance products, including models for liability projections, experience and persistency analysis, claims analysis, policy data administration, and financial/accounting data maintenance
- Strong expertise (minimum seven years' experience) in information technology
    - Must include experience with actuarial projection software, SQL programming, Excel, Access and database warehousing. Knowledge of MoSes, Barrie & Hibbert, and/or worker/manager structures highly desirable
- Capital markets knowledge and/or experience (at least one year) - familiarity with Bloomberg, CFA designation a plus
- Familiarity with stochastic modelling and economic scenario generators, via work experience or education
- Genuine aptitude for working in a small team environment
- Ability to meet tight deadlines
- Successful applicant will be able to work extended hours and weekends when required
