

Securis Investment Partners LLP ("Securis") is a London-based Investment Manager, established in 2005. It is authorised and registered with the UK FCA and currently employs 53 staff with presence in 5 countries. Securis manages approximately US\$5bn AUM. The investment strategy is to invest exclusively in Insurance Linked Securities across both Life and Non-Life segments. Securis ILS Management Ltd, Bermuda ("Securis Bermuda"), a wholly owned subsidiary of Securis Investment Partners LLP, was established in May 2014 and primarily operates to source, analyse and underwrite insurance, reinsurance and retrocession opportunities within the Bermudian and US markets. Securis Bermuda currently has 8 employees.

Securis launched its Lloyd's platform in 2015 and, since then and on behalf of its investors, has gained access to direct property business through its Bermuda-based Insurance team (4 full time) headed by Herbie Lloyd. The Insurance division of Securis is a growing and strategically important component of Securis' operational and risk-transformation infrastructure. Securis' Insurance team is seeking to hire a Senior Non-Life Analyst to provide additional resource for all aspects of the underwriting and analytical process, specifically supporting:

- Pricing
- Portfolio management
- Reinsurance purchasing
- Reserving
- Data management
- Reporting and valuation
- Systems development
- Investor Relations

Minimum requirements include:

- MSc degree in a numerate/financial discipline
- At least 3 years' experience underwriting within an ILS fund environment with specific exposure to direct property business
- Experience working in and a robust understanding of the US non-admitted property market particularly the delegated authority segment
- Firm understanding of and experience using catastrophe models, including model blending techniques and their implementation
- Experience analysing and comparing parametric products, cat-in-a-box structures, collateralised quota-share deals, structured sidecar opportunities and more traditional risk transfer products, preferably within a client facing advisory role
- Understanding of the Lloyd's business planning and capital frameworks
- Proficient at coding in both SQL and VBA

Closing Date: 24 November 2017
