bespoke software
Business Intelligence
We've got you covered

Bespoke Software is seeking an IT professional for the position of Business Intelligence Consultant. Consulting services to be provided include BI solution requirements gathering, solution design and architecture, development, testing, documentation and support, primarily using the Microsoft SQL Server toolset. Responsibilities also include involvement in developing new clients or new opportunities at existing clients by providing technical, architectural and design input into the sales cycle, as well as providing guidance and mentoring for more junior staff from time to time.

The position requires University Level Education in Computer Science or equivalent, 5+ years experience in developing Business Intelligence or Data Warehouse solutions using the Microsoft SQL tool set (TSQL, SSIS, SSRS, SSAS), 2+ years experience delivering data visualization solutions, experience in client development and relationship management, excellent interpersonal skills, both written and verbal, ability to relocate to Bermuda for a minimum of 2 years.

Experience in the Insurance, Reinsurance or Finance industry, working knowledge of DundasBI, MDX and exposure to Agile development methodology an advantage.

This position is full time, on location. Applications from Telecommuters will not be considered. Please email applications to info@bespoke.bm include your resume and 2 references who are prepared to take our call. We are unable to consider applications that do not meet these criteria.

Applications close Fri 9 Feb 2018.
