Digicel is looking for a top candidate to fill the role
of Outside Plant Project Manager (18 month Fixed Term Contract)

job overview

Digicel is seeking an experienced Outside Plant Project Manager on an 18 month fixed term contract. Reporting to the Head of Operations, the Outside Plant Project Manager will be responsible for the overall direction, coordination, design, implementation, execution, control and completion of all Outside Plant construction and maintenance projects and activities ensuring consistency with the long term strategy, commitments and goals. The successful candidate will also be responsible for leading Outside Plant initiatives that will support multiple platforms, products and service offerings across the business to ensure that commitments of time and quality are being met.

Primary Responsibilities include (but are not limited to):

- Provide leadership and management direction to the Outside Plant design, build, maintenance and GIS / records teams to facilitate the ongoing development and sustainability of the FTTH Network
- Prepare project plans and refine processes to include activities in accordance with project planning, execution, monitoring and control and closure
- Support and facilitate the migration to and delivery of services on the FTTH network
- Facilitate and lead the interaction with both local and overseas monitoring and support entities to identify and resolve any network inconsistencies
- Ensure compliance with all safety requirements in line with company standards and government regulations
- Determine, assign and direct all project resources to ensure that quality and productivity standards are both met and exceeded
- Review deliverables prepared by design team to ensure the project on track
- Effectively apply company methodology and enforce project standards and processes
- Conduct and direct all quality control activity, identifying, snagging and resolving any work items that do not meet the required standards
- Ensure project documents and registers are complete, certified, and stored appropriately
- Provide training and development opportunities for all team members inclusive of career and succession plans

The successful candidate will possess the following qualifications, skills and experience:

- Advanced Degree in Business or related discipline
- Demonstrated experience managing the construction and maintenance of large Fibre networks
- Extensive knowledge of GPON, FTTH and FTTB networks
- At least 5 years of experience working in a project management role or a senior operations role

Interested persons should apply with a cover letter and detailed resume via www.btc.bm, click on the Careers link.

Closing date: March 12th, 2018
