

# Senior Project Manager

We are seeking an individual who is self-motivated, agile, and solution driven. The Senior Project Manager will be responsible for managing the delivery of key strategic business projects. The successful candidate will be accountable to the Project Sponsor and will work closely with all levels of internal and external stakeholders. This position is a one year fixed term contract.

## Core responsibilities include:

- Lead complex strategic programs involving business change, process change, technology deployment and manage all aspects of various projects included within those programs over the entire lifecycle
- Manage high profile and complex stakeholder relationships
- Manage the performance of the team members assigned to various projects which will include mentoring, coaching and motivating
- Provide advice and guidance with respect to project changes and change management
- Develop project-specific deliverables to enable successful delivery of scope to budget and plan
- Manage projects that require cross-team and cross-functional coordination including internal and external teams in different countries and time zones
- Manage project budget including cash flows, costs, and approvals for vendor transactions
- Manage multiple stakeholders and relevant projects simultaneously
- Support stakeholders with their testing of change requests and platform enhancements, including investigating and resolving issues that arise during testing
- Provide periodic status reports to Project stakeholders in line with project methodology
- Other tasks as required to ensure success of assigned projects

## Qualifications and experience required:

- University degree in Business, Finance or Technology
- Project management certification (PMP, Prince2, Agile, etc.) or equivalent work experience
- Minimum of eight years of senior project management knowledge and experience.
- Ten years' experience operating in regulated financial services (banking, insurance, wealth) companies
- Experience of digital projects and roll out to customers and clients
- Proven experience working with "core" application projects at all phases of lifecycle from requirements, system selection, implementation, data conversion and post go live roll out
- Excellent communication skills - written and oral
- Proven track record managing project teams remotely in multiple locations/time zones
- Good interpersonal and leadership skills, with a customer-focused attitude
- Evidence of well-defined critical thinking, analytical, problem solving, and organization skills
- Proficient in change management process
- Proficiency in working with Microsoft Office Suite and Project Management software
- Ability to travel for extended periods in support of the projects

**Closing Date:** May 22, 2018
