

HVAC SERVICE TECHNICIAN

Eff Tech Ltd is looking for a highly qualified air conditioning service technician.

- The successful applicant will have completed an industry recognized apprenticeship and also have a minimum of 5 years field experience installing and servicing mini-split and VRF air conditioning systems. Light commercial refrigeration experience would be an asset.
- This is a senior position and the successful applicant will be tasked with servicing our existing customers as well as working with the management team to secure new accounts.
- Eff Tech Ltd. is committed to providing innovative solutions which enhance the quality and value of the service we provide. The successful applicant will work with their client base and Eff Tech Ltd. Management team to develop and implement individual solutions.
- Specific product technical training will be provided to the successful applicant

The standards that we have adopted are rigid, ensuring that the systems we install and service meet or exceed worldwide standards. If you are conscientious and take pride in your work, please send your resume to our Human Resource Department.
