

Aecon Airport Constructors Limited is currently recruiting for a Senior Site Engineer. The **Senior Site Engineer** will provide field-engineering information to project management team and sub-trades to ensure construction works comply with all the design drawings, engineering standards, codes and specifications.

Senior Site Engineer

Key Duties & Responsibilities:

- Participate in layout and field engineering activities
- Maintain lines and levels – verify as built conditions
- Research and resolve drawing interpretation problems, conflicts, interferences and errors.
- Maintain field logs
- Review subcontractor shop drawings
- Interpret design/drawings for sub-trades installing material and equipment
- Present design discrepancies to design consultants for resolution, prepare documentation, field design change requests, etc., as required
- Prepare and disseminate all required documentation records such as punch lists describing work items to be done, sketches of work already completed, material requirement calculations, etc.
- Verify that all completed work complies with applicable codes, drawings and specifications
- General subcontractor coordination
- Prepare “as built” drawings, as required
- Support the site superintendent, as required
- Other duties and responsibilities, as required

Minimum Qualifications & Experience:

- Education to include a technical college diploma or equivalent combination of technical training and/or related experience
- Minimum of five years’ experience in site engineering or equivalent
- Working knowledge of surveying techniques, equipment, standards and procedures
- Total station proficiency with Leica/Sokkia instrumentation
- Ability to assume responsibility, interface and communicate with others
- Able to perform in a fast-paced environment
- Exposure to construction work site environment in all seasons
- Flexibility to travel, as required, on short notice

Interested persons should apply in writing no later than October 4th, 2018 to:
