

BCM McALPINE LTD.

Require a

Construction Equipment Mechanic

Responsibilities will include all activities associated with the preventative maintenance and repair of a wide range of construction equipment including cranes, telehandlers and mixers, as well as smaller gasoline power equipment like generators, pumps etc.

The successful applicant will be a self-motivated individual, will be a good timekeeper and will have a flexible approach to work. They will be prepared to work evenings and weekends, when required, to attend to emergency repairs. A proven ability to liaise with management and other staff, part suppliers and specialist technical support is a necessity.

The successful applicant will be able to demonstrate at least 5 years directly relevant experience, working on a wide range of equipment. Must have good computer skills. He/she will have a valid Heavy "C" driver's license and should have a recognized Mechanic's certification.

Applicants should apply in writing by January 31, 2019, providing details of qualifications and relevant experience, to:
