

Our people are our competitive advantage.

At Butterfield, we pride ourselves on being approachable, disciplined and proactive. If you embody these qualities and have the necessary experience, you may be the one we're looking for.

Vice President, Applications Technical Specialist Group Technology

This position reports to the Senior Vice President, Group Head of Information Technology and Chief Information Officer and is responsible for ensuring that the company's data and application interfaces are organised, robust and fit for purpose by strategically designing, developing, and implementing interfaces and data models for enterprise-level applications and systems.

Your responsibilities will include:

- maintaining knowledge of all components of the banking platforms and interactions/interfaces with internal and external applications
- participating in the evaluation and implementation of third party applications, software and tools
- providing expertise on technology drivers and trends in order to align the Bank's technology vision with long-term business strategy
- establishing processes for governing the identification, collection and use of corporate metadata; taking steps to assure metadata accuracy and validity
- assessing and determining governance, stewardship and frameworks for managing data across the organization, including ensuring that data strategies and architectures are in regulatory compliance
- identifying and executing cost saving and/or cost avoidance initiatives specific to data related spends
- ensuring the success of enterprise-level application enhancement rollouts (e.g. Online, FCUBS, SAP, Portia, Navision and SOA)
- liaising with the technology partner to oversee selection of products and/or services that best meet company goals
- collaborating and communicating with key stakeholders at all levels for projects involving enterprise data
- overseeing the mapping of data sources, data movement, interfaces and analytics with the goal of ensuring data quality
- addressing data-related problems in regards to systems integration, compatibility and multiple-platform integration

Your experience / skills may include:

- university degree in computer science, information systems or computer engineering, with a minimum of ten years' experience in financial services applications and data at a senior level
- hands-on experience with core banking applications (i.e. FCUBS), custody applications (i.e. Portia), Online Banking, Interbank clearing and EDI.
- good knowledge of applicable data privacy practices and laws
- advanced understanding of relational data structures, theories, principles and practices
- strong familiarity with metadata management and associated processes
- hands-on knowledge of enterprise repository tools, data modeling tools, data mapping tools and data profiling tools
- demonstrated expertise with repository creation, and data and information system life cycle methodologies
- experience with business requirements analysis, entity relationship planning, database design and reporting structures
- experience with database platforms, including Oracle, SQL, etc.
- understanding and proficiency with Web services (SOAP, XML, UDDI, WSDL)
- object-oriented programming knowledge (e.g. using Java, J2EE, EJB, .NET, WebSphere, etc.)
- experience with data processing flowcharting techniques and software
- proven senior level project management experience
- excellent client/user interaction skills
- proficient in Microsoft Office suite of applications and advanced level Excel skills including, but not limited to, macros, pivot tables, etc.
